

# VEJLEDNING OM PERSONLIGE VÆRNEMIDLER (PPE)

Personlige værnemidler (PPE) er en af flere foranstaltninger til at beskytte arbejdere mod farer, der er identificeret på arbejdspladser i forbindelse med håndtering af varm bitumen. Personlige værnemidler skal vælges afhængigt af det nødvendige beskyttelsesniveau fra den arbejdspladsspecifikke fare- og risikovurdering. Nedenfor gives en anbefaling om personlige værnemidler til operationer med maksimalt beskyttelsesniveau, f.eks. under leverancer, arbejde i raffinaderier/terminaler, på pålæsningssteder. Anbefalede personlige værnemidler i f.eks. laboratorier vil variere.
